

Hotel Owner Registration & Approval Workflow

Platform Functional Specification Document

Prepared for: Hotel Booking Platform

07 August 2026

1. Hotel Owner Onboarding

The platform supports two distinct pathways for hotels to join the system:

Option 1 — Admin Adds Hotel

- Admin can manually create a hotel profile.
- Admin assigns the hotel to an existing owner or creates a new hotel owner account.
- The hotel owner receives login credentials via email.
- After login, the hotel owner can manage only their assigned hotel.

Option 2 — Hotel Owner Registration Request

A hotel owner can sign up and submit a Hotel Registration Request. The request includes the following information:

Field	Description
Hotel Name	Name of the property being registered
Business / Owner Name	Legal or trading name of the business owner
Email	Primary contact email address
Phone Number	Primary contact phone number
Hotel Address	Full street address of the hotel
City	City in which the hotel is located
Country	Country in which the hotel is located
Google Maps Location	Pinned location / coordinates
Hotel Description	Narrative description of the property
Number of Rooms	Total room count
Hotel Category	1–5 Star, Boutique, Guest House, Apartment, etc.
Business License	Optional upload
CNIC / Identity Verification	Optional upload
Hotel Logo	Image upload
Cover Image	Image upload

2. Approval Workflow

After Submission

- The hotel remains in Pending Approval status.
- The hotel owner cannot publish rooms or receive bookings until approval.
- Admin receives a notification of the new request.

Admin can:

- Review the application
- Approve
- Reject
- Request additional information

If Approved

- Hotel status changes to Approved.
- The owner receives an email notification.
- Full Hotel Owner Dashboard is unlocked.

If Rejected

- Hotel status becomes Rejected.
- Admin can provide a rejection reason.
- The owner can edit the application and resubmit it.

3. Hotel Owner Dashboard (After Approval)

Only after approval can the hotel owner access the following capabilities:

- Edit hotel profile
- Upload hotel logo
- Upload hotel cover image
- Upload unlimited hotel gallery images
- Add room categories
- Add room photos
- Add room amenities
- Set room prices
- Set room availability
- Manage bookings
- Accept or reject reservations
- Update room availability calendar
- View customer reviews
- Respond to reviews
- Track revenue
- View booking analytics
- Request free cleaning service based on eligible bookings

4. Admin Hotel Management

Admin Dashboard Sections

- Pending Hotel Requests
- Approved Hotels
- Rejected Hotels
- Suspended Hotels

For Every Hotel, Admin Can:

- View complete application
- Approve or reject requests

- Suspend or reactivate hotels
- Edit hotel details
- Verify hotel information
- View booking statistics
- View cleaning service eligibility
- Assign cleaning teams
- Send notifications to hotel owners

5. Hotel Status Flow

Draft → Pending Approval → Approved → Active → Suspended (if necessary)

Only Approved hotels are visible on the public website and can accept reservations.

6. Security Rules

- Hotel owners can access only their own hotel data.
- Customers can view only approved hotels.
- Admin has full access to all platform data.
- Implement Supabase Row Level Security (RLS) for all tables.
- Protect all dashboards with role-based authentication and authorization.
